To Whom It May Concern,

Subject: Recommendation Letter

I am writing on behalf of the Somaliland Ministry of Water Resources Development (MoWRD) to express our strong support and enthusiasm for the proposed collaboration with the European Francophone Centre-France (CEFFCA) on the project aimed at strengthening resilience in the face of water stress at the borders between Ethiopia, Somalia, and Somaliland. This project, currently in its proposal stage, holds significant promise for addressing the critical challenges related to water scarcity and resource management in this region.

The MoWRD recognizes the urgent need for sustainable water resource management, particularly in areas prone to water stress and conflict. The borders between Ethiopia, Somalia, and Somaliland represent a region where the availability of water is crucial for the livelihood of communities and the stability of the area. Given the transboundary nature of water resources, collaboration with international partners like CEFFCA is vital to achieving long-term solutions that benefit all stakeholders.

The MoWRD is committed to providing all necessary support and resources to ensure the effective implementation of this initiative. We are confident that this partnership will lead to significant improvements in water resource management, enhance resilience against water stress, and contribute to regional stability and prosperity.

The MoWRD looks forward to the opportunity to work closely with CEFFCA in this development and eventual implementation of this important project. We are ready to contribute our local knowledge, expertise, and resources to this collaborative effort and are confident that together, we can make a lasting impact on the communities at the borders of Ethiopia, Somalia, and Somaliland.

Thank you for considering this important partnership. We welcome the opportunity to collaborate with CEFFCA and are hopeful for the positive outcomes that will arise from this joint initiative.

Yours sincerely

Abubakar Abdirahman Good
Minister of Water Resources Development
